SUMMARY

SOC Analyst and System Administrator with hands-on experience in Security Monitoring, Splunk Enterprise, SIEM, Threat Detection, Incident Response, Windows Server Administration, Linux Administration, and Active Directory. Experienced in monitoring security events, analyzing logs, investigating alerts, administering enterprise infrastructure, and implementing security best practices. Strong understanding of MITRE ATT&CK, OWASP Top 10, Windows Security, Networking, and Blue Team operations. Passionate about strengthening enterprise security through proactive monitoring, automation, and incident response.

TECHNICAL SKILLS

SIEM & Security Monitoring: Splunk Enterprise | SPL Queries | Dashboards | Alerting | Event Correlation | Log Analysis
SOC Operations: Alert Triage | Incident Response | Threat Detection | IOC Analysis | Security Monitoring | MITRE ATT&CK
Windows Administration: Windows Server 2012/2016/2019/2022/2025 | Active Directory | Group Policy | DNS | DHCP | Hyper-V | PDC, CDC, RODC
Linux Administration: Ubuntu | RHEL | Rocky Linux | Shell Scripting | SSH | System Hardening | Kali Linux | YUM Server
Networking: TCP/IP | VPN | LAN/WAN | Routing | Firewall | Wi-Fi Troubleshooting
Security Tools: Splunk | Wireshark | Burp Suite | Metasploit | Nmap
Programming: Python | PowerShell | SQL | Bash
Concepts: OWASP Top 10 | ITIL | Cyber Kill Chain | Incident Response | Vulnerability Assessment

PROFESSIONAL EXPERIENCE

System Administrator, Bits & Bytes Services Pvt. Ltd 06/2025 – Present | Nashik, India

- Managed Windows Server and Linux infrastructure for enterprise clients.
- Administered Active Directory, Group Policy, DNS, DHCP, and user access.
- Delivered SLA-driven L1/L2 technical support and infrastructure troubleshooting.
- Monitored LAN/WAN, VPN, and enterprise networks.
- Implemented system hardening, patch management, backup, and access control.
- Supported server deployment, virtualization, storage, and data center operations.
- Followed ITIL-based incident management procedures to resolve technical issues efficiently.

PROJECTS

Enterprise Log Analysis & Threat Detection using Splunk ,
Tools: Splunk Enterprise, Zeek, Linux SSH Logs, Apache Logs, AWS GuardDuty

- Centralized DNS, HTTP, SSH, Apache, and cloud logs.
- Developed SPL queries to detect brute-force attacks, DNS tunneling, malware beaconing, and web exploitation.
- Built real-time alert rules for incident response.
- Correlated multi-source logs to identify advanced attack patterns.
- Improved SOC visibility through centralized log monitoring.

SOC Monitoring Dashboard using Splunk , Tools: Splunk Enterprise, SPL

- Designed enterprise SOC dashboards.
- Visualized authentication anomalies, attack trends, firewall events, and web traffic.
- Built dashboards for brute-force detection and security monitoring.
- Improved analyst visibility through actionable security insights.

CERTIFICATIONS

Certified Red Team Analyst (CRTA)

Security Blue Team – Network Analysis

Tech Mahindra Cyber Security Program

Oracle Cloud Infrastructure 2025 Certified Architect Associate

arcX Threat Intelligence Analyst

Edureka Linux Fundamentals

Google Professional Cybersecurity Certificate

Reliance Foundation Cyber Security Associate

Cisco Introduction to Cybersecurity

Netleap IT Training and Solutions Pvt Ltd
CCNA, MCSA, RHCSA, RHCE, CYBER SECURITY, PEH, EH

EDUCATION

Bachelor of Engineering (B.E.) – Computer Engineering 06/2022 – 05/2025 | Nashik, India
Brahma Valley College of Engineering, Nashik
CGPA: 7.66/10
